

PATENT COOPERATION TREATY

From the
INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

12 AGO 2004

PCT

NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Rule 71.1)

To:

ARNAUD, Antonio M P
Rua Jose' Bonifacio, 93-
9th floor
01003-901 Sao Paulo- SP
BRESIL

Date of mailing
(day/month/year)

06.08.2004

Applicant's or agent's file reference
MULTI-011

IMPORTANT NOTIFICATION

International application No.
PCT/BR 03/00038

International filing date (day/month/year)
14.03.2003

Priority date (day/month/year)
15.03.2002

Applicant
MULTIBRAS S.A.ELETRODOMESTICOS

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. **PCT/BR 03/00038**

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, Pages

1-5 as originally filed

Claims, Numbers

1-7 received on 19.06.2004 with letter of 02.06.2004

Drawings, Sheets

1/2-2/2 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
☐ the language of publication of the international application (under Rule 48.3(b)).
☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority in written form.
☐ furnished subsequently to this Authority in computer readable form.
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/BR 03/00038

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	1-7
	No: Claims	
Inventive step (IS)	Yes: Claims	1-7
	No: Claims	
Industrial applicability (IA)	Yes: Claims	1-7
	No: Claims	

2. Citations and explanations

see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/BR 03/00038

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following documents:

D1: DE-U-9210721

D2: US-A-1899272

2. Closest prior art is considered to be D1 which shows a lamp support according to the preamble of claim 1, in particular with a tubular body that has a enlarged projection.

The subject-matter of claim 1 differs from this known lamp support in that the tubular body incorporates a deflective wall formed in a single piece which surrounds laterally and axially with a certain spacing the lamp.

The problem to be solved may be regarded as to deflect the heat generated by the lamp.

D2 discloses a lamp support with a deflective wall, but the wall is not formed in a single piece with the body of the lamp.

A combination between D1 and D2 does not directly lead to the subject-matter of claim 1.

3. The passage "and from and along part" in the characterising part of claim 1 is not clear (Article 6 PCT).

CLAIMS

1. A lamp support for a cabinet including a tubular body (10), which carries adjacent to an end (11), a lamp socket (S) receiving by an open opposite end (12)
5 a lamp (L) having part of its extension projecting outwardly from said opposite end (12) of the tubular body (10), characterized in that the opposite end (12) of the tubular body (10) incorporates, in a single piece and along part of its peripheral extension, a
10 deflective wall (20) which is dimensioned to surround, laterally and axially and with a certain spacing, the portion of the lamp (L) projecting outwardly from the tubular body (10).
2. The support according to claim 1, characterized in
15 that the deflective wall (20) presents a radial flap (21) having an internal edge (22) incorporated to the tubular body (10), and an external edge (23) incorporating an arcuated wall portion (24), with a generatrix parallel to the axis of the lamp support
20 and which laterally and axially surrounds the portion of the lamp (L) projecting outwardly from the tubular body (10).
3. The lamp support according to claim 2, characterized in that the radial flap (21) is
25 orthogonal to the arcuated wall portion (24).
4. The lamp support according to claim 3, characterized in that the arcuated wall portion (24) is coaxial to the axis of the tubular body (10) of the support and is projected beyond the portion of the
30 lamp (L) projecting outwardly from the tubular body (10).
5. The support according to claim 4, characterized in that each of the parts defined by the radial flap (21) and by the arcuated wall portion (24) is non-
35 perforated.

REPLACED BY
ART 34 ANDT

6. The lamp support according to claim 5, characterized in that the deflective wall (20) is incorporated in a single piece to the tubular body (10) from the peripheral edge of the opposite end (12) of the latter.

7. The lamp support according to claim 1, characterized in that the deflective wall (20) presents a circumferential extension between 90° and 180°.

REPLACED BY
ART 34 AMDT
